

# Spectranetics® Lead Management:

**Manage Every Lead.**

*Safely. Predictably. Responsibly.*

Spectranetics is committed to helping you manage every lead—safely, predictably and responsibly. That’s why our portfolio of lead extraction solutions encompasses safe, proven laser technology and next-generation mechanical tools.

There are 13 million leads worldwide and another 1.4 million implanted each year. The need for lead management is growing; proactive management is essential to patient health.

## **GlideLight™ Laser Sheath**

GlideLight offers the unprecedented ability to customize the laser repetition rate so you can use less force and advance more efficiently through tough binding sites.

## **SLS II™ Laser Sheath**

The SLS II incorporates optical fibers arranged in a circle. The energy emitted from the tip ablates the tissue holding the lead, thereby freeing the lead in a controlled fashion.

## **TightRail™ Rotating Mechanical Dilator Sheath**

Flexibility meets control in mechanical lead extraction. Next-generation design advances offer control, safety and precision in lead extraction.

*Always Reaching Farther*

### SightRail™ Manual Dilator Sheath

Features printed indicators for bevel orientation and alignment, plus a longer outer sheath for ease of manipulation.

### VisiSheath™ Dilating Sheath

VisiSheath may be used alone as an independent sheath for dilating tissue surrounding cardiac leads or as an enhanced outer support sheath in conjunction with compatible inner sheaths, such as SLS® II Laser Sheath.

### LLD™ Lead Locking Device

LLD™ Lead Locking Device provides superior traction, visibility and versatility during challenging lead removal procedures. It's the only lead locking stylet that locks along the entire length of the lead body.

### CVX -300™ Eximer Laser System

Spectranetics manufactures and markets the only excimer laser system and disposable catheters for the treatment of peripheral and coronary arterial disease and lead extraction and management.
