

# Spectranetics Vascular Intervention

## PERFORMANCE DEFINES US

Spectranetics offers comprehensive solutions to cross, prep and treat the most complex morphologies associated with coronary and peripheral diseases. See specific indications for product details.

- [Turbo-Elite™ Laser Atherectomy Catheter](#)
  - Spectranetics excimer laser technology treats complex cardiovascular conditions by vaporizing multiple morphology lesions consisting of calcified and fibrotic plaque, thrombus and neointimal hyperplasia in the peripheral vasculature.

- [Turbo-Tandem™ Laser Guide Catheter](#)
  - Integrates proven Spectranetics technologies to ablate plaque above the knee, restoring blood flow to the lower extremities.

- [AngioSculpt® PTA Scoring Balloon Catheter](#)
  - Comprised of a nitinol scoring element which encircles a semi-compliant balloon to score plaque circumferentially, providing a precise and predictable dilatation across a range of lesion types.

- [Quick-Cross™ Support Catheters](#)
  - Have helped thousands of physicians cross tortuous anatomy, allow for exchange of guidewires, and provide a conduit for delivery of saline and diagnostic contrast agents.

- [Quick-Cross Capture™ Guidewire Retriever](#)
  - Easily, reliably and safely helps you capture and exchange guidewires.

- [Turbo-Tape™ Radiopaque Tape](#)
  - Is intended to be used for assisting health care professionals with landmarking and measuring during vascular and endovascular procedures performed under fluoroscopy.

- [CVX-300™ Excimer Laser System](#)
  - Spectranetics manufactures and markets the only excimer laser system and disposable catheters for the treatment of peripheral and coronary arterial disease and lead extraction and management.

# Spectranetics Coronary Intervention

## PERFORMANCE DEFINES US

Spectranetics offers comprehensive solutions for coronary artery disease to cross complex lesions, prep vessels by modifying plaque and enhance the delivery of definitive therapies. See specific indications for product details.

- [ELCA® Laser Ablation Catheter](#)

- Spectranetics excimer laser technology treats complex cardiovascular conditions by vaporizing multiple morphology lesions consisting of calcified and fibrotic plaque, thrombus and neointimal hyperplasia in the coronary vasculature

- [AngioSculpt® PTCA Scoring Balloon Catheter](#)

- Comprised of a nitinol scoring element which encircles a semi-compliant balloon to score plaque circumferentially, providing a precise and predictable dilatation across a range of lesion types.

- [QuickCat™ Extraction Catheter](#)

- Aspiration catheter combining the best features of other aspiration catheters into one device. QuickCat is your first choice for fresh, soft thrombus removal.

- [Quick-Cross™ Support Catheters](#)

- Have helped thousands of physicians cross tortuous anatomy, allow for exchange of guidewires, and provide a conduit for delivery of saline and diagnostic contrast agents.

- [CVX-300™ Excimer Laser System](#)

- Spectranetics manufactures and markets the only excimer laser system and disposable catheters for the treatment of peripheral and coronary arterial disease and lead extraction and management.
